

## **CFO**

### **Ardmore Enterprises**

This CFO position is both highly strategic and deeply operational. As is common in nonprofit leadership, the role requires hands-on involvement in day-to-day financial and organizational operations while also providing high-level strategic leadership in close partnership with the executive team.

#### **What This Role Is**

- A hands-on leadership role with direct responsibility for daily financial operations
- A strategic partner to the CEO and executive team on long-term planning, sustainability, and growth
- A collaborative role requiring regular cross-functional engagement and shared decision-making
- A position that balances execution and vision in a mission-driven environment

#### **What This Role Is Not**

- A purely advisory or oversight-only CFO role
- A siloed position operating independently of other departments
- A role removed from operational details or frontline financial processes

#### **Key Responsibilities**

- Oversee and actively participate in day-to-day financial operations, including budgeting, forecasting, cash flow management, and financial reporting
- Partner with the executive team and department leaders to align financial strategy with organizational goals
- Ensure strong internal controls, risk management practices, and compliance with nonprofit regulatory requirements
- Support organizational sustainability through strategic financial planning and analysis
- Foster a collaborative, transparent, and accountable financial culture across the organization

#### **Ideal Candidate Profile**

- Demonstrated experience as a hands-on CFO or senior financial leader, ideally in a nonprofit or mission-driven organization
- Comfortable operating at both the strategic and operational levels
- Strong collaborator with the ability to work effectively across departments
- Practical, solutions-oriented, and willing to engage directly in execution
- Committed to the mission and values of the organization
